Szanowni klienci, drodzy przyjaciele!

Minione dwa sezony przeżyliśmy w cieniu ogólnoświatowej pandemii. Wiele wydarzyło się wokół nas, nie zawsze radosnego. Pozytywem tej trudnej sytuacji jest wzrost zainteresowania roślinami, szczególnie roślinami ozdobnymi. Ludzie zauważali ponownie terapeutyczną rolę ogrodu i ogrodnictwa.

Naszym zadaniem i misją jako ogrodników jest pomóc odkryć to, co naprawę piękne, zachować radość i wewnętrzną równowagę. Jako firma staramy się w tym pomagać, dostarczając wysokiej jakości materiał wyjściowy, a także stale się rozwijając oraz wdrażając innowacyjne technologie. Kładziemy również coraz większy nacisk na myślenie przyjazne naturze, kierując się eko-logiką. Dotyczy to szczególnie rosnącego udziału środków biologicznych w ochronie naszych sadzonek z jednoczesną redukcją zużycia pestycydów. Nasze powierzchnie produkcyjne w Polsce w Trzęsaczu i Łochowie, w Portugalii, a od dwóch lat także gospodarstwo Alkemade w Holandii, wspomagają nas w osiąganiu założonego celu dostarczania naszym klientom jakościowo najlepszej sadzonki.

Katalog bylin, który Państwu przedstawiamy, jest inny od dotychczasowych. Pojawia się bowiem informacja o naszej holenderskiej firmie Alkemade. Ta należąca do Vitroflory spółka z siedzibą w Lisse jest wyspecjalizowanym producentem ukorzenianych sadzonek bylin. Dlatego dla ułatwienia wszystkim poruszania się po naszej ofercie zdecydowaliśmy o jej uporządkowaniu i przesunięciu tak zwanych podstawowych odmian na listę ofertową Alkemade. Tak jak dotychczas pozostają one dostępne dla Państwa, są jednak osobno wyróżnione w katalogu. Możecie je zamawiać przez naszych przedstawicieli i poprzez stronę internetową. Dla niektórych produktów zmienia się standard palety.

DRODZY OGRODNICCY!

Prosimy zwrócić szczególną uwagę na kilka zmian wprowadzonych w warunkach sprzedaży.

Podstawowa oferta Vitroflory koncentruje się na odmianach o szczególnie wysokim potencjale dekoracyjnym i sprawdzonej przydatności do uprawy w pojemnikach. Najczęściej są to odmiany rozmnażane in vitro. Nadal rozbudowujemy i dopracowujemy asortyment w najważniejszych grupach takich jak Echinacea, Heuchera czy Rudbeckia. Zachęcamy by szczegółowo zapoznać się z bogactwem możliwości jakie dają te rośliny. Dla każdego rozmiaru doniczki i każdego terminu uprawy pomożemy wybrać odpowiednie odmiany. Zawsze możecie Państwo liczyć na dodatkową pomoc ze strony naszych sprzedawców.

W czasie kiedy piszemy te słowa (kwiecień 2021 roku) sytuacja gospodarcza wokół nas dynamicznie się zmienia. Rwał się łańcuchy dostaw i szybko rosły ceny. Musimy być przygotowani na każdą nową sytuację.

Mamy nadzieję, że zmiany wokół nas, szczególnie te związane ze wzrostem kosztów oraz pandemią wyhamują i wszyscy będziemy mogli z radością koncentrować się na produkcji oraz cieszyć dobrą sprzedażą naszych produktów w dobrych cenach.

Tego sobie i Państwu życzymy!

EN | Dear Clients and Friends!

The last two seasons have been clouded by the global pandemic situation. Many of the events that have taken place around us have not always been pleasant. Nevertheless, the positive aspect in the present situation is raising interest in ornamental plants. People are discovering, in a new way, the therapeutic role of gardening and horticulture.

Our mission as gardeners is to help find the real beauty of nature, maintain the joy and find inner balance. As a company we do our best in providing high quality starting material through our consistent development of innovative technological applications, as well as focusing on activities which are ecologically friendly, i.e., running our business from the 'eco-logic' perspective. It is primarily related to increasing quantities of biological plant protection products while reducing the use of pesticides. Our production areas in Poland (Trzesacz and Lochowo), Portugal and Holland (Alkemade) are joining hands in achieving the goal of providing highest quality plant material to our clients.

The present perennials catalogue varies from all the previous ones. It contains information about our Dutch company Alkemade. This Lisse-based company is a specialized producer of rooted perennial cuttings. Therefore, in order to make it easier for everyone to navigate through our offer, we decided to organize it and move the so-called basic varieties to the Alkemade offer list; they remain available to you as before but are highlighted separately in the catalogue. You can order them through our representatives and via

the website. Tray standard of some products may be changed. The core of Vitroflora's offer is focused on varieties with a particularly high decorative potential and proven suitability for container growing. This is shown most of all the In-vitro varieties. We are constantly expanding and refining the assortment in the most important groups such as Echinacea, Heuchera and Rudbeckia. Richness of possibilities offered by these plants is worth noting. We will help you to choose the varieties for the required pot size and growing dates. You can always count on additional assistance through our customer service.

At the time when we are publishing this text (April 2021), the economic situation around us is changing dynamically: supply chains are getting disrupted, and prices are rising rapidly. We must be prepared for any new coming situations.

We hope that the changes around us, especially rising expenses and the pandemic situation, will slow down and we will all be able to focus on the production process and enjoy good sales of our products at a good price.

We sincerely wish that to you and to us.

DE | Sehr geehrte Geschäftspartner, Liebe Freunde!

Die letzten zwei Saisons haben wir im Schatten der weltweit verbreiteten Pandemie gelebt. In diesem Zeitraum hat sich im Leben jedes Menschen viel ereignet, was leider nicht immer positiv und fröhlich war. Die gute Seite der schwierigen Situation ist aber ein großer Anstieg des Bedarfs an Pflanzen, besonders Zierpflanzen, denn die Konsumenten haben wieder die therapeutische Rolle des Gartens entdeckt.

Wir Gärtner haben die Aufgabe Menschen zu helfen und sowohl das Schöne zu entwickeln als auch Freude und innere Harmonie durch unsere Produkte zu vermitteln. Der Jungpflanzenproduzent Vitroflora bemüht sich durch Einführung neuer, innovativer Technologien, steigender Anwendung von biologischen Mitteln im Pflanzenschutz und zugleich Reduzierung von chemischen Wirkstoffen – Pflanzenbiologisches Denken in seinen Prozeduren zu verankern und umzusetzen. Unsere Betriebe in Polen (Trzesacz und Lochowo), Portugal als auch seit 2 Jahren in Holland (Gebrüder Alkemade) unterstützen uns das wichtige Ziel zu erreichen.

Der Staudenkatalog, den wir Ihnen jetzt präsentieren ist anders als bisher. Hier erscheint die Information über unsere holländische Firma Alkemade mit dem Sitz in Lisse, die zu Vitroflora gehört. Alkemade ist ein hochspezializierter Produzent von bewurzelten Staudenjungpflanzen. Um Ihnen unser breites Gesamtangebot näher und einfacher zu bringen, haben wir uns entschlossen die Grundprodukte auf die Alkemade-Sortimentliste zu platzieren. Wie bisher sind diese Artikel für Sie verfügbar, aber separat im Katalog aufgeführt. Sie werden wie immer die Möglichkeit haben,

diese weiterhin mit Hilfe Ihrer Vertreter als auch via unsere Webseite zu bestellen. Für manche Artikel ändert sich auch die Plattengröße.

Bitte beachten Sie auch einige Änderungen in den Geschäftsbedingungen. Das Vitroflora-Angebot konzentriert sich auf Sorten, die sich besonders für den Anbau in Containern als „visuelle Stauden“ eignen. Oft sind das In-Vitro vermehrte Pflanzenarten. Wir arbeiten ständig daran, unser Angebot von wichtigen Kulturen wie Echinacea, Heuchera und Rudbeckia zu verbessern und zu verbreitern. Gerne teilen wir dieses Wissen mit Ihnen, damit Sie Ihre Geschäfte optimieren und mehr Zuspruch bei Ihren Kunden finden können. Wir helfen Ihnen gerne entsprechende Sorten für jede Topfgröße und für jeden Topftermin zu wählen. Sie können auf die professionelle Hilfe und Unterstützung unserer Gebietsvertreter und des Innendienstes zählen.

Gerade zum Zeitpunkt der Veröffentlichung dieses Textes (April 2021) unterliegt die Wirtschaftssituation ständigen Unwägbarkeiten. Die Lieferketten zerbrechen und die Preise steigen. Daher müssen wir für jede neue Situation bereit sein. Wir hoffen, dass die Anpassungen die besonders mit dem Kostenanstieg und der Pandemie verbunden sind, bald aufhören und wir uns mit Freude auf die Pflanzenproduktion konzentrieren und uns über den Verkauf zum Endkunden zu guten Preisen freuen können.

Dies wünschen wir uns allen.

NL | Geachte klanten, Lieve vrienden!

De afgelopen twee seizoenen hebben wij in de schaduw van een wereldwijde pandemie geleefd. Om ons heen is er veel gebeurd, niet altijd prettig. De toegenomen interesse voor planten, vooral de decoratieve planten is toch het positieve aspect van deze moeilijke situatie. Mensen hebben de therapeutische rol van tuin en tuinieren opnieuw ontdekt.

Onze taak en missie als tuiniers is om mensen te helpen ontdekken wat echte pracht is en daarbij de vreugde en innerlijk evenwicht te behouden.

Als bedrijf doen wij ons best om hierbij te helpen door startmateriaal van hoge kwaliteit aan te bieden. Dit doen we door constante ontwikkeling, implementatie van innovatieve technologieën en door steeds meer nadruk te leggen op natuurvriendelijke denken volgens eco-logica. Dit geld vooral voor het groeiende aandeel van biologische beschermingsproducten voor onze stekken met de gelijktijdige verminderd gebruik van pesticiden. Onze productiegebieden in Polen (Trzescacz, Łochowo), Portugal en sinds twee jaar ook de plantenteler Alkemade in Nederland ondersteunen ons bij het bereiken van onze gestelde doelen, namelijk het voorzien onze klanten van een stek van de beste kwaliteit.

Deze vaste planten catalogus die wij u aanbieden wijkt af van de vorige. In deze catalogus vindt u de informatie over ons bedrijf Alkemade dat in Lissen gevestigd is. Dit bedrijf dat onderdeel is van Vitroflora, is een gespecialiseerde teler van gewortelde vaste plantenstekken. Om het voor iedereen gemakkelijker te maken om door ons aanbod te navigeren, hebben we besloten de zogenaamde basissoorten naar de aanbodlijst van Alkemade te verplaatsen.

Zoals eerder, blijven ze voor u beschikbaar maar ze worden in de catalogus apart onderscheiden. U kunt ze via onze vertegenwoordigers en via de website bestellen. Voor sommige producten wordt de standaard van de pallet veranderd. Let ook op enkele wijzigingen in de verkoopvoorraarden. Het basisaanbod van Vitroflora richt zich op plantsoorten met een uitonderlijk hoog decoratief potentieel en bewezen geschiktheid voor teelt in containers. De meeste variëteiten zijn in vitro veredeld. In de belangrijkste groepen zoals Echinacea, Heuchera en Rudbeckia zijn we nog steeds bezig met het uitbreiden en afronden van het assortiment. We raden u aan om de rijkdom aan mogelijkheden van deze planten in detail te onderzoeken. Voor elke potmaat en elke teeldatum helpen wij u graag bij het kiezen van de passende variëteiten. U kunt altijd rekenen op aanvullende ondersteuning van onze verkopers.

Terwijl we deze woorden schrijven (april 2021) is de economische situatie om ons heen zich dynamisch aan het ontwikkelen. Toeleveringsketens worden verstoord en prijzen stijgen snel. Wij moeten ons voorbereiden op elke nieuwe situatie.

Wij hopen dat de veranderingen om ons heen, vooral die met betrekking tot de stijgende kosten en de pandemie zullen afremmen. Wij verwachten dat we ons allemaal op de productie kunnen concentreren en daardoor kunnen we genieten van een goede verkoop tegen goede prijzen.

Dat wensen we u en onszelf toe.

RU | Уважаемые клиенты, Дорогие друзья!

Последние два сезона мы прожили в условиях всемирной пандемии, вокруг нас происходят различные события, которые не всегда приятные. Тем не менее позитивным фактором является постоянно растущий спрос на декоративные растения. Люди открывают заново терапевтическую роль садоводства и огородничества.

Нашим заданием и миссией является помочь клиенту отыскать истинную красоту поддерживая радость и внутренний баланс. Как компания мы стараемся предоставить исходный материал наилучшего качества при постоянном развитии и внедрении инновационных технологий. Мы также делаем большой упор на экологическое мышление, а именно следуем эко-логике. Это особенно касается растущей доли биологических удобрений в защите наших саженцев одновременно сокращая использование пестицидов.

Наши производственные объекты в Польше (Ченсач и Лохово), Португалии и в Нидерландах (уже два года в Алькемаде) поддерживают нас в достижении наших целей - предоставлять нашим клиентам саженцы высочайшего качества.

Предоставлен Вам каталог многолетников отличается от предыдущих. Сдесь есть информация от нашей голландской компании Алькемаде в Лиссе принадлежащая Витрофлоре, которая является специализированным производителем укорененных многолетних черенков. Поэтому, чтобы всем было легче ориентироваться в нашем предложении, мы перенесли так называемый основные разновидности в список предложений Алькемаде; они остаются доступными для вас, как и раньше, но выделены отдельно в каталоге. Вы можете заказать их у наших представителей и на сайте. Для некоторых продуктов меняется стандарт паллет.

Просим Вас также обратить свое внимание на несколько изменений условий продажи.

Основное предложение Витрофлоры сосредоточено на сортах с особенно высоким декоративным потенциалом и проверенной пригодностью для выращивания в контейнерах. Самые распространенные сорта размножают in vitro. Мы продолжаем расширять и улучшать ассортимент наиболее важных групп, таких как эхинацея, хейхера иrudbeckia. Мы рекомендуем вам ознакомиться с богатством возможностей, предлагаемых этими растениями. Мы поможем вам выбрать подходящие сорта для каждого размера горшка и каждого срока выращивания. Вы всегда можете рассчитывать на дополнительную помочь наших продавцов.

Пока мы пишем эти слова (апрель 2021 года), экономическая ситуация вокруг нас динамично меняется. Цепочки поставок нарушены, а цены быстро растут, поэтому мы должны быть готовы к любой новой ситуации.

Мы надеемся, что события вокруг нас, особенно связанные с увеличением затрат и пандемией, замедлятся, и мы все сможем с радостью сосредоточиться на производстве и хороших продажах по хорошим ценам на нашу продукцию.

Этого мы желаем Вам и себе.

PRODUCTS MOVED TO ALKEMADE LIST

EN | **Products moved to Alkemade list** - The varieties highlighted below have been assigned to a list of products traditionally offered by our company Alkemade in the Netherlands. To continue to provide you with the opportunity to order seedlings we list them in this distinguished part of the catalog. You can order as before, in some cases only the standard pallet will change. Depending on the size of the individual order it will be delivered from Poland - Vitroflora or directly from Holland - Alkemade.

PL | **Produkty przeniesione do listy Alkemade** - Odmiany wyróżnione poniżej zostały przypisane do listy produktów tradycyjnie znajdujących się w ofercie naszej firmy Alkemade w Holandii. Chcąc nadal zapewnić Państwu możliwość zamawiania sadzonek wymieniamy je w tej wyróżnionej części katalogu. Zamawiać można jak dotychczas, w niektórych przypadkach zmieni się jedynie standard palety. W zależności od wielkości jednostkowego zamówienia dostawała będzie miała miejsce z Vitroflory lub bezpośrednio z Holandii.

HEUCHERA SKY HIGH

SELECTED CHOICE FOR A SUCCESSFUL
HEUCHERA POT CULTURE

Heuchera SKY HIGH programme

**4 selections of Heuchera & Heucherella
for every taste and pocket.
For 10-13cm pot production.**

Each Sky High group contains the 8 basic colors combined with a habit that is well suited and produces a good and uniform sales-ready plant in 10-13cm pots. The main difference between the groups is the average royalty rate.

The Sky High groups show that for every sales channel and targeted sales price a solution from Vitroflora is available.

DE | 4 Selektionen Heuchera und Heucherella für jeden Geschmack und Geldbeutel 10-13cm Produktion.

Jede Gruppe enthält die 8 Grundfarben in Kombination mit einem guten Pflanzenaufbau, der eine gute und einheitliche verkaufsfertige Pflanze in 10-13cm Töpfen hervorbringt. Der Hauptunterschied zwischen den Gruppen ist der durchschnittliche Lizenzsatz.

Die Sky High-Gruppen zeigen, dass für jeden Vertriebskanal und den angestrebten Verkaufspreis eine Lösung von Vitroflora verfügbar ist.

NL | 4 selecties Heuchera en Heucherella voor elke smaak en budget 10-13cm productie.

Elke groep bevat de 8 basiskleuren in combinatie met een goede plantstructuur die een goede en uniforme plant oplevert die klaar is voor de verkoop in potten van 10-13 cm. Het belangrijkste verschil tussen de groepen is het gemiddelde royaltytarief.

De Sky High-groepen tonen aan dat er voor elk distributiekanaal en elke beoogde verkoopprijs een Vitroflora-oplossing beschikbaar is.

PL | 4 grupy Heuchery i Heucherelli na każdy gust i każdą kieszeń. Do produkcji w doniczkach 10-13cm.

Każda z grup Sky High zawiera 8 odmian w podstawowych kolorach oraz o zbliżonym pokroju. Proponowany przez nasz dobór odmian gwarantuje wyrównaną produkcję roślin gotowych do sprzedaży w doniczkach 10-13cm. Istotną różnicą między grupami jest średnia stawka opłaty licencyjnej.

Z grupami Sky High dopasowanie asortymentu dla każdego typu produkcji staje się proste. Najlepsze rozwiązanie znajdziesz w Vitroflorze.

RU | 4 варианта Heuchera и Heucherella на любой вкус и карман. Для выращивания в горшках размером 10-13 см.

Каждая группа Sky High содержит 8 разновидностей основных цветов и с похожей формой. Наша подборка сортов гарантирует сбалансированное производство растений, готовых к продаже в горшках 10-13 см. Существенной разницей между группами является средняя лицензионная ставка.

С группами Sky High согласование ассортимента для каждого вида продукции становится очень легким. Лучшее решение найдено в Vitroflora.

Flamenco™

Striking and unique colours

- Pot size: perfect for 3l pot
- Flower size: medium size, semi-double
- Flowering time: medium early
- Habit: compact habit without PGR
- New colours, changing when the flower ages

DE | Neue, einzigartige Farben

- Topfgröße: ideal für 3l
- Blütengröße: halb-gefüllt mittelgroß
- Blütezeit: mittel früh
- Wuchs: kompakt wachsend ohne Hemmstoff
- Neue Farben, die sich ändern, wenn die Blüte altert

PL | Zachwycające, unikatowe kolory

- Doniczka: doskonałe do 3l
- Kwiat: średni, półpełny
- Kwitnienie: średniowczesne
- Pokrój: zwarty, bez użycia PGR
- Kwiaty zmieniają kolor podczas okresu kwitnienia

NL | Nieuwe en unieke kleuren

- Potmaat: perfect voor 3l pot
- Bloemgrootte: middelgroot, halfdubbel
- Bloeitijd: middelvroeg
- Vorm: compacte groeiwijze zonder PGR
- Nieuwe kleuren, die veranderen naarmate de bloem ouder wordt

RU | Удивительные уникальные цвета

- Горшок: идеально подходит для 3л
- Цветок: средний, полусфера
- Цветение: средне-раннее
- Размер: компактный, без PGR
- Цветы меняют цвет в период цветения

Sunbeckia®

Very big, single flowers

- Pot size: perfect for 5l pot and bigger
- Flower size: very big with thick petals
- Flowering time: medium early
- Habit: vigorous growth
- PGR required for early potting weeks

DE | Sehr große Einzelblüten

- Topfgröße: ideal für 5L und größer
- Blütengröße: sehr groß mit dicken Petalen
- Blütezeit: mittel früh
- Wuchs: stark wachsend
- Hemmstoff für frühe Topfwochen benötigt

PL | Bardzo duże pojedyncze kwiaty

- Doniczka: doskonałe do 5l i większych
- Kwiat: bardzo duży z grubymi płatkami
- Kwitnienie: średniowczesne
- Pokrój: silny wzrost
- PGR wymagane do sadzenia we wcześniejszych terminach

NL | Sehr große Einzelblüten

- Potmaat: perfect voor 5l pot en groter
- Bloemgrootte: zeer groot met dikke bloemblaadjes
- Bloeitijd: middelvroeg
- Vorm: krachtige groei
- PGR nodig voor vroeg oppotten weken

RU | Очень большие отдельные цветки

- Горшок: идеально подходит для 5л и побольше
- Цветок: очень большой с толстыми лепестками
- Цветение: средне-раннее
- Размер: сильный рост
- PGR, необходимый для посадки в ранний период

Littlebeckia™

Abundance of flowers

- Pot size: for 13-19cm
- Flower size: multiflora
- Flowering time: early
- Habit: compact dome-shaped
- Up to 5 layers on CC

PL | Niebywała obfitość kwitnienia

- Doniczka: do 13-19cm
- Kwiat: mały, wlele kwiatów
- Kwitnienie: wcześnie
- Pokrój: zwarty, kulisty
- Do 5 poziomów na wózku CC

RU | Невероятное обилие цветения

- Горшок: до 13-19 см
- Цветок: маленький, букет цветков
- Цветение: рано
- Размер: компактный, сферический
- До 5 уровней на СС тележке

DE | Überfluss an Blumen

- Topfgröße: ideal für 13-19cm
- Blütengröße: multiflora
- Blütezeit: früh
- Wuchs: kompakt, kuppelförmig
- Bis 5 Lagen auf CC Karre

NL | Overvloed aan bloemen

- Potmaat: voor 13-19cm
- Bloemgrootte: multiflora
- Bloeitijd: vroeg
- Vorm: compact koepelvormig
- Tot 5 lagen op CC

PL | Kompaktowe, silne odmiany

- Doniczka: doskonale do 3l
- Kwiat: średni
- Kwitnienie: bardzo wcześnie
- Pokrój: zwarty, bez użycia PGR
- Łatwe w uprawie

RU | Компактные, сильные разновидности

- Горшок: идеально подходит для 3л
- Цветок: средний
- Цветение: очень раннее
- Размер: компактный, без PGR
- Легко выращивается

DE | Kompakter und starker Wuchs

- Topfgröße: ideal für 3L
- Blütengröße: mittel
- Blütezeit: sehr früh
- Wuchs: kompakt wachsend ohne Hemmstoff
- Leichte Kultur

NL | Compacte en sterke

- Potmaat: perfect voor 3l pot
- Bloemgrootte: middelmatig
- Bloeitijd: zeer vroeg
- Vorm: compacte groeiwijze zonder PGR
- Gemakkelijke cultuur

SmileyZ™

Compact and strong habit

- Pot size: perfect for 3l pot
- Flower size: medium size
- Flowering time: very early
- Habit: compact habit without PGR
- Easy culture

PL | Odmiany o zwartym pokroju do dużych pojemników

- Doniczka: doskonale do 5l
- Kwiat: średni do dużego
- Kwitnienie: wcześnie
- Pokrój: średnio silny wzrost
- Polecane do jesiennej sprzedaży

RU | Сорта компактной формы для больших емкостей

- Горшок: идеально подходит для 5л
- Цветок: средний ближе к большому
- Цветение: раннее
- Размер: средне-высокий рост
- Рекомендуется для осенней продажи

DE | Kompakt für größere Konatinierer

- Topfgröße: ideal für 5L und größer
- Blütengröße: mittel bis groß
- Blütezeit: früh
- Wuchs: mittel stark wachsend
- Ideal für den Herbstverkauf

NL | Compact voor grotere containers

- Potmaat: perfect voor 5l pot
- Bloemgrootte: middelgroot tot groot
- Bloeitijd: vroeg
- Vorm: Middelsterke groei
- Zeer geschikt voor herfstverkoop

SmileyZ™ BIG

Compact for bigger containers

- Pot size: perfect for 5l pot
- Flower size: medium size to large
- Flowering time: early
- Habit: Medium strong growth
- Great for autumn sales

A close-up photograph of dense green grass growing in a black plastic tray. The grass is long and blade-like, with some blades showing signs of wear or discoloration. The tray is dark and appears to be made of a durable plastic material. In the bottom left corner of the tray, there is a small white label with some handwritten text on it.

VIRTOFLORA GENERAL TERMS AND CONDITIONS

Article 1

- General Terms and Conditions: these general terms and conditions.
- Parties: Vitroflora and the Customer.
- Vitroflora: Vitroflora Grupa Producentów sp z o.o.

Article 2

Applicability

- These General Terms and Conditions apply to any and all offers, sales or deliveries by Vitroflora to a Customer or any other agreements among Vitroflora and a Customer.
- Any provisions contrary to the General Terms and Conditions must be agreed upon in writing and insofar they do not replace the relevant provisions of the General Terms and Conditions, they are deemed to be supplementary to the General Terms and Conditions.
- A copy of the General Terms and Conditions shall be available on the website of Vitroflora.

Article 3

Offers and prices

- All offers of Vitroflora are non-binding unless otherwise agreed in writing. An offer shall be valid for a maximum of 30 days.
- An agreement is deemed to be concluded by the written confirmation of the offer by the Customer, unless Vitroflora objects the confirmation in writing within five days after Vitroflora has received the confirmation from the Customer.
- If an agreement is concluded by an agent, representative or other intermediary on behalf of Vitroflora, the agreement shall only be deemed to be concluded once it has been accepted in writing by Vitroflora.
- Prices are excluding VAT and additional expenses, such as transport charges, packaging costs, cost of quality control and/or phytosanitary inspection, import duties, government and other official levies, and fees under breeders' rights and any other fees, unless explicitly otherwise agreed in writing.
- If Vitroflora's expenses for a sale or delivery increase significantly since the price for this sale or delivery was set, Vitroflora is entitled to adjust the price to a reasonable level.
- Unless otherwise indicated, all prices are in euro (€).
- If the Customer cancels the agreement, the Customer shall immediately owe to Vitroflora, without prior notice being required, a cancellation charge of 25% of the gross sale value of the products to be delivered. In the event the relevant products prove to be unsaleable, or only saleable at a lower price, as a result of said cancellation, the Customer shall be liable for any price difference and other damages incurred by Vitroflora. The Parties are obliged to limit any damages resulting from a cancellation as much as possible.

Article 4

Conditions of sale

- Orders for plants and/or cultivation material that is not yet fully grown at the time of purchase shall be accepted subject to the normal cultivation average of good plant material with a good appearance.
- Partial or complete failure of the cultivation or harvest of starting material or partial spoilage during storage for any reason shall release Vitroflora from the obligation to deliver and his other obligations, unless attributable to gross negligence on the part of Vitroflora.
- Vitroflora is also entitled to assure a replacement delivery, which shall occur on the same terms as originally agreed.
- If the delivery of a type that has been ordered is not possible for any reason, Vitroflora shall be entitled to deliver a type that is equivalent as much as possible or to cancel the order if the type ordered cannot be delivered, or the Customer does not accept a different type; Vitroflora shall endeavour to deliver a different type.

Article 5

Delivery and transport

- Delivery is ex works unless explicitly otherwise agreed. On delivery, the risk of the relevant products is transferred to the Customer with everything that is connected thereto.
- After consultation with the Customer, Vitroflora shall determine the delivery date or the delivery period. If a delivery date or a delivery period is agreed on, Vitroflora shall endeavour to maintain that date or period for delivery. If Vitroflora cannot deliver on the agreed delivery date or within the agreed delivery period, he shall inform the Customer as quickly as possible. After consultation with the Customer, Vitroflora shall determine the new delivery date or the new delivery period.
- If the Customer receives the relevant products before the agreed delivery date or delivery period as referred to in paragraph 2, the resulting risk is entirely for the Customer.
- If the Customer receives or wishes to receive the relevant products after the agreed delivery date or delivery period, the risk of any loss of quality resulting from longer storage shall be entirely for the Customer. If, after a certain storage period that may be considered reasonable in view of the type of product, the Customer has not received the product and the risk of loss of quality and/or spoilage of the products leaves no other option, the order shall be deemed to have been cancelled by the Customer, in which case the Customer is obliged to pay the damage incurred by Vitroflora as a result.

Article 6

Packaging/carts/pallets

- Single-use packaging shall be charged at cost price and returns shall not be accepted.
- All packaging except single-use packaging remains the property of Vitroflora.
- Vitroflora is entitled to charge the Customer an agreed user fee for re-usable packaging and other durable material, to be specified separately on the invoice.
- The Customer is obliged to return the packaging to Vitroflora at his own expense and in good condition, within 30 days from delivery or immediately after planting. If it has been agreed that Vitroflora is to collect the packaging, the Customer must ensure that the packaging remains in good condition until the date indicated by Vitroflora and store it so that Vitroflora may collect it in a normal manner.
- The Customer may not keep the packaging in use or allow it to be used by third parties.
- Carts, rolling containers, re-usable pallets must be returned immediately unless agreed otherwise. It is not permitted for the Customer to use them for his own purposes or give them to third parties.
- In the event of damage to re-usable packaging, carts, rolling containers, pallets, etc., the Customer is obliged to pay the cost of repairs or replacement and any additional rental charges resulting from late returns.

Article 7

Payment

- Vitroflora is entitled to request an advance payment of 50% of the invoice amount from the Customer.
- Payment must occur within thirty days after the invoice date.
- The Customer is not entitled to set off any counterclaim the Customer may have against Vitroflora with the purchase price he is to pay.
- The Customer is not entitled to suspend the fulfilment of its payment obligation in the event of a complaint he has submitted to Vitroflora regarding the products delivered, unless Vitroflora explicitly agrees with such suspension under the conditions to be set by Vitroflora.
- All payments shall be made at the offices of Vitroflora or by deposit on or wire transfer into a bank account to be indicated by Vitroflora.
- Payments must be made in euro (€) unless otherwise indicated on the relevant invoice. In case the invoice indicates that a payment may be made in another currency, Vitroflora is entitled to charge the Customer for any exchange rate fluctuations.
- If the Customer does not fulfil his payment obligation in time, he shall be deemed to be legally in default. Vitroflora shall then be entitled to charge interest at 1% monthly from the date that the Customer is in default of fulfilling the payment obligation as mentioned in paragraph 2, with a partial month being counted as a whole month. In addition, in case the second sentence of paragraph 6 applies, Vitroflora is also entitled to charge the Customer for any (further) exchange rate fluctuations incurred by the Customer's default.
- If the Customer is in default or otherwise fails in fulfilling one of his obligations, all reasonable charges in obtaining satisfaction, both legal and extralegal, shall be at the Customer's expense.
- Vitroflora reserves the right not, or no longer, to carry out, orders or agreements if previous deliveries have not been paid for by the Customer or the Customer has not fulfilled, or is at risk of not fulfilling, his obligations to Vitroflora. Vitroflora is not responsible for any damage to the Customer as a result of not carrying out orders.

Article 8

Force majeure

- Force majeure refers to any circumstance outside the direct sphere of influence of Vitroflora in which fulfilment of the agreement can no longer reasonably be expected. This may include strikes, fire, extreme weather conditions or government measures and disease and plagues, or faults in the material supplied to Vitroflora.
- If Vitroflora cannot carry out the delivery because of force majeure, Vitroflora must inform the Customer of the circumstances in writing as soon as possible.
- In the event of force majeure, the Parties shall agree a change to the agreement or a (partial) dissolution of the agreement.
- If the Parties cannot agree on a change or dissolution within 10 days after the written notice of the circumstances in question, either of the Parties may then turn to a judge.

Article 9

Unforeseen circumstances for the Customer

- In the event of unforeseen circumstances that are so serious that Vitroflora may not reasonably expect that the purchase agreement concluded shall remain in effect unchanged, the Parties shall agree a change to the purchase agreement or complete or partial dissolution of the purchase agreement.
- If the Parties cannot agree on a change or (partial) dissolution within 10 days after the written notice of the unforeseen circumstances, either of the Parties may then turn to a judge.

Article 10

Guarantees and complaints

- Vitroflora does not guarantee the genuineness of the products that are generally known to branch back.
- Vitroflora does not guarantee the growth and blossoming of the products delivered.
- The Customer shall at all times be provided with all requested cultivation information to the best of Vitroflora's knowledge and abilities, by or on behalf of Vitroflora, but without any liability of Vitroflora arising therefrom.
- Complaints regarding visible defects, including those regarding the quantity, size or weight of the products delivered, must be indicated to Vitroflora within two days after delivery and Vitroflora must be informed in writing within eight days.
- Complaints regarding non-visible defects must be indicated to Vitroflora immediately after detection (within two days at the latest) and Vitroflora must be informed in writing within eight days.
- Complaints must also be indicated to Vitroflora at such time that Vitroflora can check the plant material.
- A complaint must at least include (i) an extensive and precise description of the defect, (ii) the storage location of the cultivation material to which the complaint relates, and (iii) a listing of the facts on the basis of which it can be determined that the products delivered by Vitroflora and those rejected by the Customer are the same.
- If the products delivered are rejected by the Customer under the terms of this article and the Customer and Vitroflora do not immediately agree on an amicable settlement, the Customer must then appeal to an independent, officially accredited expert who shall draw up an expertise report. The costs of the expertise report shall be for Vitroflora if the rejection is justified and for the Customer if the rejection is not justified. The costs of the expertise report must be prepaid by the Customer in any event.
- Complaints regarding a portion of the products delivered cannot give rise to a rejection by the Customer of the entire delivery.
- The Customer is obliged to check the quantity of the shipment delivered, or have it checked, on receipt and to report a deviation in the quantity to Vitroflora.
- Issuing a complaint does not suspend the Customer's obligation to pay, regardless of any justification of a complaint.

Article 11

Liability

- All liability regarding non-timely delivery is hereby excluded, unless the ultimate agreed delivery date or the final date of the delivery period is exceeded by more than seven days.
- If the delivery date or the final date of the delivery period is exceeded by more than seven days, Vitroflora must be given written notice, whereby the Customer shall set a reasonable period for Vitroflora to fulfil his obligations nonetheless.
- Vitroflora is not liable for damage caused by force majeure as indicated in article 8 paragraph 1.
- Compensation by Vitroflora of any damage incurred by the Customer in the event of a complaint submitted under article 10 shall not be higher than the invoice value of the products delivered referred to by the complaint that proves to be justified, provided there is culpability or conscious negligence on the part of Vitroflora.
- In the event of a partial failure of the harvest as a result of the products delivered for the Customer, the compensation owed by Vitroflora for the damage incurred by the Customer shall not exceed a percentage of the purchase price of the products delivered, which is at most equal to that portion of the harvest that has failed for the Customer. If, when damage is reported, Vitroflora and the Customer jointly or a third party determines the percentage of deviating, diseased or weak plants, this percentage shall determine Vitroflora's maximum liability. The Customer is obliged to ensure that the damage as a result of deviating, diseased or weak plants is limited as much as possible.
- Damage compensation may not be deducted by the Customer from any outstanding account payable to Vitroflora and does not entitle the Customer not to pay the invoice amount, or not to do so by the invoice payment date.

Article 12

Transfer of ownership, retention of ownership and surety

- Notwithstanding the provisions of paragraph 2, ownership of the products is transferred to the Customer at the time of delivery as referred to in article 5.
- Vitroflora shall retain ownership of the products he has delivered and shall retain or acquire ownership of the products arising from them until the agreed price has been paid in full by the Customer and the Customer has completely fulfilled any and all of his other obligations to Vitroflora.
- If there is any doubt in the mind of Vitroflora regarding the ability of the Customer to pay, Vitroflora shall be entitled to defer performances until Vitroflora has stood surety for payment or to terminate the agreement by cancellation, if the Customer has not provided surety for payment within fourteen days after being ordered to do so, notwithstanding the terms of article 4 paragraph 1. In both cases, the Customer shall be liable for the expenses incurred by Vitroflora.

Article 13

Contractual protection or protection under breeders' rights of original species

- Starting material and plant material of species protected by a breeders' right applied for or granted in the Netherlands or any other country or by a contractual transfer provision may not be (i) used to produce or further reproduce the species, (ii) treated for the purpose of reproduction, (iii) brought into the realm of commerce, (iv) traded further, (v) exported, (vi) imported, or (vii) kept in stock for one of these purposes.
- The starting material delivered may be used by the Customer only to cultivate end products at the Customer's business and may be used by the Customer only under the relevant species name and brand name if applicable.
- Vitroflora is entitled to access to the business of the Customer or lots under the Customer's control where the starting or plant material delivered by Vitroflora is located to view and/or assess said material. Vitroflora shall inform the Customer of his arrival in a timely manner.
- The Customer is obliged to provide immediate access to his business and the crops to inspection authorities carrying out inspections on behalf of the owner of a protected species delivered to him. The Customer must also provide immediate access to his records (e.g. invoices) that are relevant to such inspection.
- If the Customer finds a mutant in the protected species, he must immediately inform the holder of the breeders' right by registered letter.
- At the written request of the holder of the breeders' right, the Customer shall provide the holder of the breeders' right, within two months of receiving the request, with test material of the mutant, free of charge.
- The Customer is aware that the finder of a mutant, being a significant derived species, in the protected species, requires the permission of the holder(s) of the breeders' right regarding the 'parent species' to exploit the mutant.
- In particular, the Customer is aware that the finder of a mutant requires the permission of the holder of the breeders' right regarding the 'parent species' to carry out the actions mentioned in paragraph 1 regarding all material of the species, including harvested material (hence also flowers, plants and/or plant parts).
- The Customer is obliged to provide all co-operation desired by Vitroflora, including co-operating in collecting evidence, in the event that Vitroflora becomes involved in proceedings regarding breeders' rights or other industrial property rights.

Article 14

Dispute settlement

- These General Terms and Conditions and any dispute or claim arising out of or in connection with it, its subject matter or formation (including non-contractual disputes or claims) shall be governed by and construed in accordance with Polish law.
- All disputes (even those deemed as such by only one party) regarding or arising from the agreements concluded between Vitroflora and a Customer established abroad to which these General Terms and Conditions apply may exclusively be settled by the Polish judge who is competent in the area in which Vitroflora is established.

Article 15

Applicability of the appendix

- The Parties may declare the 'regulations on supplement percentages to be charged in the event of divergent germination percentages' appended to these General Terms and Conditions to be applicable by agreement. The appendix shall then be part of the agreement to which these General Terms and Conditions also apply.

Article 16

Price changes

- Until the completion of the order, Vitroflora reserves the right to change the price of the products in case of changes in the components of the price, i.e. costs of materials, labels, packaging, taxes, import duties, exchange rate differences, etc., by more than 5% in relation to the price of these components on the date of confirmation of the transaction.

 Wymienione w katalogu propozycje są jedynie sugerowanym sposobem wykorzystania odmian z oferty dla ogrodników - producentów gotowego materiału i uwzględniają te okresy w których rośliny są najefektywniejsze. Wszystkie oferowane byliny mogą być uprawiane i sprzedawane przez cały rok niezależnie od fazy rozwoju. Dobór assortymentu zależy jedynie od wiedzy, inwencji i potrzeb uprawiającego. Niepowodzenia w uprawie, wynikające z niefachowego zastosowania podanych informacji, leżą w zakresie odpowiedzialności uprawiającego.

 Examples presented in the catalogue show only suggested ways of using the varieties offered for the growers - producers of the final material, and they apply to the periods when the plants are the most attractive. All the offered perennials can be grown and sold all year round, irrespective of their stage of development. Selection of the assortment depends only on the knowledge, invention and needs of the grower. Vitroflora does not take responsibility for production failure resulting from improper use of the presented information.

 Die im Katalog angeführten Beispiele sind Vorschläge zur Nutzung der Unterarten aus dem Angebot für Gärtner - Produzenten des fertigen Materials und präsentieren die Pflanzen im Zeitraum der vollen Vegetationsphase. Alle angebotenen Stauden können, unabhängig von der Entwicklungsphase, das ganze Jahr über angebaut und verkauft werden. Die Wahl des Sortiments hängt allein vom Wissen, Kreativität und Bedarf des Anbauers ab. Mängel im Ergebnis, die sich aus unfachlicher Handhabung ergeben, liegen im Verantwortungsbereich des Anbauers.

 De voorbeelden die in de catalogus worden gegeven, zijn slechts suggesties voor het gebruik van de aangeboden variëteiten door de telers en producenten van het eindmateriaal, zij gelden voor de perioden waarin de planten het aantrekkelijkst zijn. Alle aangeboden vaste planten kunnen het hele jaar door worden geteeld en verkocht, ongeacht het ontwikkelingsstadium. Selectie van het assortiment hangt uitsluitend af van de kennis, vindingrijkheid en behoeften van de kweker. Vitroflora neemt geen verantwoordelijkheid voor mislukte productie als gevolg van onjuist gebruik van de ter beschikking gestelde informatie.

 Перечисленные в каталоге предложения рекомендуется применять только предложенным способом использования сортов для садоводов - производителей готового материала, учитывая те периоды, в которых растения наиболее эффективные. Все наши многолетники можно выращивать и продавать в течение всего года, независимо от стадии развития растения. Выбор ассортимента зависит только от знаний, творчества и потребностей садовода. За неудачу при выращивании, в результате неправильного использования представленной информации, ответственность несет садовод.
